Emerging Software Developer with 14+years of creative experience as a published photographer and 5+ years in IT. The desire to create on a new level and increase my skills in Object Oriented Programming inspired the decision to become a full-time programmer. Excited for the opportunity to merge my creative abilities with my current and new technical knowledge to create imaginative and innovative applications for future clients.

Development Projects

Capstone Project

Full-stack web application built with Java, Spring Boot, MySQL, HTML, CSS, JavaScript, and jQuery

Veterans-Codeathon, Codeup & Geekdom 3rd place & USAA favorite

Help-Tank is a Full-stack web application built with, HTML, CSS, JavaScript, and jQuery. This was a mapbox app to show where help is needed to homeless or those in need. Help-Tanks major goal was to simplify help that is in your area.

Space-Trader

Space-Trader is a Java Servlet application to buy and sell used space goods. This project was a paired programming project.

Contacts Manager

Using java this was my first java application to write and load code from external sources. This was a great eye opening project to see just what java can do.

Coffee Project

Created a JavaScript application to allow users to search, add, and delete coffee roasts, then styled with Bootstrap
