I am highlighting a piece of mine that is a recreation of Pablo Picasso's ***Guernica***. This painting was created for personal use and display. I really wanted to challenge myself to produce one of my favorite cubist paintings by my favorite artist.

Picasso's innovative approach to art and his willingness to experiment with new techniques and styles has inspired me to take risks and explore my own creativity. Additionally, his dedication to his craft and his ability to produce a vast body of work over his long career is a mindset that I have adopted in my pursuit of art.
