

# FIND YOUR LOCAL MENTOR!

*Nature's Wisdom was a painting installation at the Witte Museum, in 2021 of animal tracks. The footprint image had brief information about the animal, and a Q.R. code to provide more information, to learn strategies about thermoregulation.*

Every track is an invitation to seek local mentors in the wild habitats. Some of them might be leaving in your backyard.

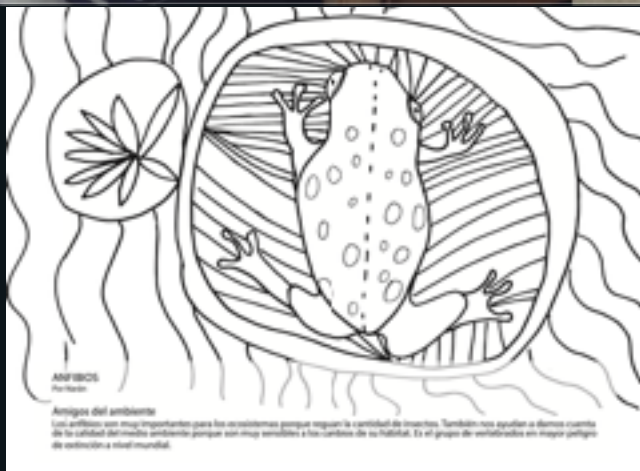

## What can we learn from Nature?

Local Mentor  
White-tailed deer

Strategy  
Thermoregulation

Function  
Insulation

**Community workshops to raise awareness of endangered species in the local environment.**

**Workshop 2018  
Zinacantan, Chiapas, Mexico**

Tzotzil children participate to make a coloring book with scientific information to create awareness in the community to preserve wildlife.

### Pilgrimage 2019

Following Nature's path of wisdom, visitors of the Witte Museum made an offering to recognize with gratitude that we belong to Nature.
