

Quadcopters:

- Israeli Army converted this drone which was originally designed for photography. Repurposed by Israeli military industries for premeditated murders, extra-judicial executions and judicial killings against Palestinian civilians through direct targeting with snipers and surveillance drones.
- Used in populated residential areas.
- Fitted with machine guns or missiles or can carry bombs.
- Automatically search buildings and create maps to identify targets.
- Machine gun shoots 64 shots. Not completely accurate. The bullets resemble a nail.
- Secondary use: Terrorize, intimidate and harm the psychological well-being of Palestinians.

Nikki Haley visited Israel on May 27, 2024 with Danny Dannon, an Israeli politician and former U.N. diplomat who took this photo and posted it on Twitter. Nikki Haley is former South Carolina governor and U.N. ambassador and ran a campaign to be the Republican nominee for President of the U.S.

Israeli female soldiers pose for a photo on a position on the Gaza Strip border, in southern Israel, Monday, Feb. 19, 2024. (AP Photo/Tsafrir Abayov)

Photo by Associated Press photographer Tsafrir Abayov. Here's what he wrote about this photo:

On this day, I was driving by, and I saw a group of female soldiers who had gone up to a tank position, on the Israeli side, about 50 meters from the border. I don't think these soldiers are normally stationed there, they just went up to take a look.

From this position you can see right into Gaza – and all the destruction. People and tanks don't normally stay up there very long because it's very exposed, so I knew I had to work quickly.
