PROFILE

I have over five years of professional experience in the arts, working as a visual artist and creative entrepreneur. My work includes creating original artwork across digital and traditional mediums, as well as designing and selling art-based products. Alongside my studio practice, I have managed all aspects of my art business, including client relations, sales, branding, and marketing. I also have extensive experience organizing and hosting art events within the community, such as paint parties and creative gatherings, providing accessible and engaging art experiences for people of all ages. Through both my artwork and events, I aim to inspire creativity, connection, and artistic confidence within the community.
